Posting Detail Information

| | |
|---|--|
| Position Summary | <p>Applications are invited for a technician position in the laboratory of Dr. Park (http://hjkri.buffalo.edu/park.html) in the Hunter James Kelly Research Institute at SUNY Buffalo. Current research efforts are focused on elucidating the transcriptional regulatory network governing the specification and differentiation of glial cells in the central nervous system (PLoS Biology 11(8):e1001624). This position is immediately available and comes with a competitive salary and full fringe benefits.</p> <p>The successful candidate should be able to maintain cell culture, perform luciferase assay, molecular cloning, Western blot, immunofluorescence, immunoprecipitation, chromatin immunoprecipitation, and quantitative PCR. He/she should also be able to handle mice, dissect mouse tissues, and perform immunohistochemistry for dissected tissue samples. Please supply the following information on the application website: 1) your CV with a publication list, 2) a brief statement of previous research experience, and 3) contact information for at least three references. Reference letters will be requested later only for highly qualified candidates. Review of applications will begin immediately and will continue until the position is filled.</p> |
| Minimum Qualifications | A Bachelor's degree with strong background in molecular and cell biology is required, and experience in cell culture, lentivirus, or animal handling is also desired. |
| Preferred Qualifications | Experience in cell culture, lentivirus, or animal handling is also desired. |
