

Clement Nsiah

Administrative Assistant, HJKRI

Clement graduated from SUNY Geneseo in 2009 with a BS in biology. During his studies at Geneseo, Clement worked as a student researcher on DNA methylation and its role in Human African Trypanosomiasis (HAT disease). Upon graduating from SUNY Geneseo, he worked as a Public Health Inspector for NYC Department of Health & Mental Hygiene before receiving his Masters in biology from Buffalo State College in 2012.

During his time at Buffalo State, he worked at Roswell Park Cancer Institute conducting experiments to develop anti-MYC pharmaceutical agents capable of either direct elimination of melanoma or sensitization of this tumor to conventional chemotherapy. He accepted a position with Penn State Medical Center in 2012 upon graduation from Buffalo State, he worked on DNA replicative activity of human DNA polymerase α on correct and Nicotine-derived nitrosamine ketone damaged DNA. Before going to Penn State, he accepted and continued to work as a part time Public Health Analyst with Ewald & Wasserman Research Consultants, LLC. Working as a Public Health Analyst, he became highly interested in public healthcare and health sciences administration.

Clement intends to earn a Doctorate degree in Health Sciences Administration and is currently a doctoral candidate at D'Youville College with Health and Policy Administration Department, which he wants to use help develop and expand programs for scientific research, preventative medicine and health care institutions.

In December 2014, he was appointed to as Office Assistant in the Hunter James Kelly Research Institute.
